Subject: Microsoft Settlement

Thank you for allowing the public to comment on the referenced settlement for Microsoft Corporation. I urge the Department of Justice to accept the terms of the antitrust settlement and immediately stop this endless waste of public tax resources. From my perspective, the Justice Department and the nine states contesting this settlement are tilting at windmills, wasting the tax payers investment and needlessly persecuting one of the most innovative and creative private enterprises of both the 20th and 21st centuries.

I would rather the resources we are using to witch hunt a major American corporation be diverted to the attack on terrorist organizations in this country.

Thank you again for this opportunity to weigh in.

Chris
